SMART Meeting Pro™
4.1 software – Personal license

Build ideas without restraint. Whether you're preparing for a meeting, collaborating in one or reviewing the information afterwards, you can access, engage and create content anytime, from anywhere.

Collaborate Naturally™ | **SMART**®

Key features

Unbound Workspace
Don't bother erasing. Just keep working. There are no space restrictions to the workspace. Insert images, hyperlinks or other files you need to work on. Write in digital ink, zoom in and out using gestures and pan across the workspace.

Write in any application
SMART Ink 3.1 lets you write in any application you're using, whether it be PDF, PPT or industry-specific software like AutoCAD®. Fully supported by Windows 10.

Radar View
Keep a maps-style overview of your content that shows your current location and content that is outside of your current view, as well as navigate to different areas of your workspace.

Bookmarks
Bookmark key content within the workspace so that you can navigate back to it for reference or in a presentation.

Shapes Tool
Import shapes into the workspace from the toolbar.

Pan and Zoom
Pan across the workspace, seamlessly zoom in to work with the details of a model, or zoom out to see an overview.

Integration with SMART Bridgit™ Conferencing Software
SMART Meeting Pro automatically creates and starts the SMART Bridgit meeting in your meeting room, as well as any other room that is joining. A separate license is required for Bridgit.

Customizable Business Gallery
Build out customized galleries using your company's templates or common imagery.

Adobe PDF integration
Insert digital ink directly into Adobe PDF files and attribute individual users to any PDF markup. Supported via in-room or remote collaboration via Bridgit. You can also instantly import PDF files into the workspace.
